

We are recruiting five faculty positions over the next two years. These new positions will be an integral part of a core group of scholars, researchers and students who will work together to design solutions to the most important environmental problems associated with energy production and use. Ideal candidates will combine a strong disciplinary background in science, social science or engineering, with a drive to conduct interdisciplinary, problem-driven and policy-relevant analysis at the energy-environment interface.

See: <http://www.ucalgary.ca/EES/jobs>

Yours,
David

David Keith
Canada Research Chair in Energy and the Environment
Department Chemical and Petroleum Engineering; and Department of Economics
